Opis produktu

When the hive mind demands brutal efficiency, the Criterions carry out their overlords' will.

Clad in jagged prosthetics and guided by another's will, these elite drudge units are the scalpel and hammer of Cephalyx conquest. Created to exact the will of their Exulon overlords, the Criterions tear through enemy lines with coordinated savagery, driven by psychic commands and unflinching obedience.

Criterions can be played as part of both the Dark Operations army and the Cryx Necrofactorium, giving you even more ways to bring your sinister strategies to life.
